

A block diagram illustrating the system architecture. It shows a central unit 10 connected to three peripheral components: a display 11, a touch panel 20, and a storage device 21. The display 11 is positioned above the central unit 10. The touch panel 20 is positioned to the right of the central unit 10. The storage device 21 is positioned below the touch panel 20. Bidirectional arrows indicate data flow between the central unit 10 and each of the three components.
